

Series 321

SEFETY CHUCK - SLIDING

A variant of classic Safety Chuck. The sliding flange allows the shaft to be locked in position while transferring torque at High RPM.

- With Dual holding mechanism - Square for Torque transferring & Round for load Handling
- Designed for higher speed applications
- Automatic locking upon Rotation
- Offers precise concentricity than the standard square type safety chuck.
- Better concentricity means less noise & vibration during the run, and greater life.
- Very little damage to shaft journals
- Replaceable Insert feature the customer cost saving and flexibility of servicing
- Extra Locking Pin with Finger Guard
